A safer alternative for car seat tolerance testing.

When nurses prepare to discharge babies, they are faced with the difficult task of performing a car seat test on the floor or on unsafe surfaces.

The Car Seat Tester provides a safe, convenient, and standard solution for car seat testing. Affording a safer patient experience and greater convenience and efficiency for staff.

Ergonomic Design

Hospital Grade Wheels

Compact

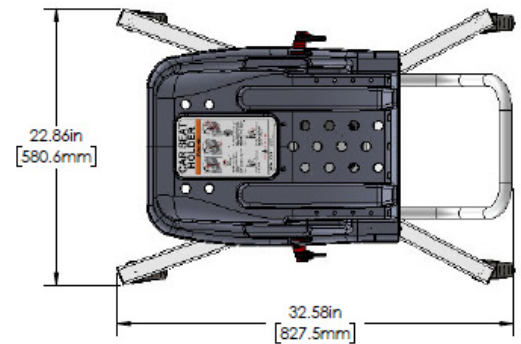

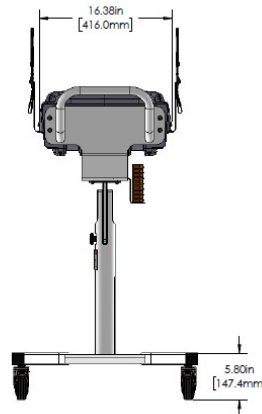

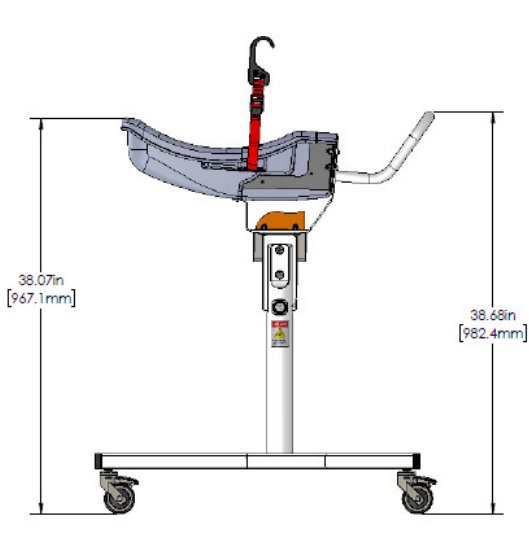

Features

1. Provides a secure and stable platform for car seat tolerance screening.
2. Infant car seat is safely supported and positioned at the proper testing angle.
3. Allows for testing in NICU and nursery environments.
4. Compatible with infant car seats.
5. Supports continuous monitoring during testing.
6. Adjustable angle simulates real vehicle seating position.
7. All materials are non-toxic and latex-free.
8. Meets applicable hospital safety standards and guidelines.
9. Compact design conserves floor space.
10. Integrated angle indicator and safety instructions.
11. Entire unit is easy to clean and maintain.
12. Constructed of durable, medical-grade materials.
13. Non-porous surfaces support infection control.
14. Locking casters provide stability during testing.
15. Lightweight, mobile design for easy transport and storage.
16. Safety Tested
